## INTRODUCTION.

---

HAVING been allowed by Mr. Woodward to make this catalogue in my own way, choosing whatever I found to suit my taste, and rejecting almost as much for want of room, I shall continue to exercise the same freedom here, addressing myself now to that republic of amateurs, popularly known as Coin Collectors.

On almost every page will be found something worthy of competition, commencing with the proof tokens of the French Republic (No. 18); and continuing with the fine Liberia pennies and half-pennies, and the Victoria and Chili patterns (Nos. 20 to 24); under the head of Foreign Copper Coins and Tokens to No. 150.

In the first series of cents are many of the very best quality. I have tried to give an exact idea of each one in the description; and, although far from claiming to be less liable than other men to make mistakes, yet I trust no one will be misled by me. A good deal has been said on this weighty topic, yet surely there is nothing occult about it. It would seem that ordinary intelligence and candor, joined to sufficient experience, ought to qualify the average man, without unduly straining his understanding, to write a reliable description of a cent.

In the small department of colonials, the N. E. Penny from Dr. Clay's collection, and the two "New Yorke" tokens, claim attention. These, with the fine and rare Florida Piece, are highly interesting and valuable coins. In the same series will be found several rare state cents, particularly varieties of the "Immune Columbia," and the rare "Gloucester Shilling" token.

The admirers of English coins will find an unexpected treat here. I confess my surprise at finding such pieces as No. 520 and 521, 524 and 525, 527 and 529, and 560 to 568, in the miscellaneous stock of an old collector. These rare and costly coins were imported by Mr. Mickley, and in some instances I have given their prices from his memoranda. The penny of Louis

le Debonaire (No. 581), and the groats of Louis XI., Henry III., and Francis II., were from the same collection.

Under the heads "American Medals," "Commemorative Medals and Private Tokens," and "Presidential and Political Medals," are many pieces quite unique, and others of which but few were struck, all of which cannot fail to attract the attention they deserve.

There are a few rare "Washington's," particularly the half dollar in copper (1185). The same may be said of "Patterns," and Nos. 1136 and 1137 are certainly among the attractions of the Catalogue. Of the regular silver coins struck at the mint, the best examples will, perhaps, be found among the dimes and half dimes, many of which are unusually fine.

The "Isle of Man collection" is presented very nearly in its original form, as described by Dr. Clay. It has been rather improved than otherwise, by removing duplicates. This is probably the most complete collection of the kind existing, and should on no account be broken up. It will be sold as a whole, if reasonable encouragement is given at the time of sale.

The few antiques offered are genuine; it is to be wished there were more of them. The snuff boxes are many of them from the John Allan collection; they were among his best.

A word of apology is due to our ardent friends, who are expected to buy the tomahawks and scalping knives, with the leggings, medicine bags, and necklaces of our red brethren and sisters; also to those admirers of flowers and ferns, who will come to see the uncounted bundles here offered. It is to be regretted that the entertainment to which they are invited is not more ample; it might have been otherwise; the material was not exhausted; we had stuffed specimens—lone pelicans from the wilderness, and social prairie dogs—but the question of *time* became momentous; it was necessary to draw a line somewhere, and we drew it between the flora and the fauna of the great Pacific slope.

W. H. STROBRIDGE.

COLONIAL AND STATE COINS AND TOKENS.

- 371 N. E. PENNY. Obv. Monogram of New England, rev. in hollow, 1. Struck over an old *Gros Turnois*; from the cabinet of Dr. Clay, unique. 5.50

At the time of the sale of Dr. Clay's Coins, it was suggested that the N. E. Penny might have been made for the American market subsequent to the origin of the demand here for such rarities. The writer never shared this opinion; it appeared to him then as it does now, that great weight should be conceded to the statement of Dr. Clay, that it was found, together with other New England money, "in one hoarded mass, where it had lain many years."

NEW YORKE TOKEN.

378 Grove of Palms. Cupid, bow in hand, running. Figure standing, partially draped. Rev. Eagle displayed. NEW YORKE IN AMERICA. In brass. Size 14, unique. *\$50.00 Elliot*

379 Same in soft metal, dark color. Very rare. *\$20.00 Leavitt*

The New Yorke token, in brass, was found in a lot of several thousand Nuremberg and French Jetons, a recent importation from the Continent of Europe by Wm. P. Brown, of New York. The other was in the Bache collection, and was once offered by Mr. Woodward at one of his sales in New York, at a limit of one hundred and fifty dollars. The writer well remembers the piece as he saw it in a drawer with the Virginia Shilling, naked bust Washington, and kindred rarities in Mr. Bache's cabinet. In the Hist. Mag., vol. v., p. 294, may be found a short account of this piece, from which the following is an extract: "There is no date to the token; but it evidently belongs to the period between 1664, when the name NEW YORKE was first adopted, and 1710, after which it was rarely spelled with an e. Without venturing to claim that this coin contains the earliest display of the American Eagle, we think it unquestionably deserves to be considered the EARLIEST NEW YORK TOKEN."

LORD BALTIMORE'S COINS.

380 Shilling. Head. CÆCILIVS: DNS: TERRÆ MARIE & CT. ✱, rev. Arms of Baron Baltimore under a crown. XII. Very fine and rare. *\$23.00 Burton*

381a Banking House, GLOUCESTER CO., VIRGINIA. In the field XII. Rev. two linked triangles. RICHARD DAWSON, ANNO DOM. 1714. Metal, fine brass. Size 14. *\$27.50 Elliott*

[Probably from the dies for a shilling token never issued. It is quite in the style of the English tradesman's silver token of this and a later period, and not unlike Chalmers' Annapolis shilling of 1783.]

[This piece, with a single known exception, is unique. The one referred to as the second, was in the cabinet of Mr. J. J. Mickley, of Philadelphia, and was sold for \$52 50. It is only fair to say, that this is the finer of the two, that being described as pierced.]

1516 Pompeian Furnace, on ten feet. On a level with the bottom are ten openings of 1 inch diameter, the cylinder contracting from the width of the base, which is ten inches, to about four near the top. A hard and tough Terra Cotta, slightly imperfect. 10 inches high.

NOTE.—Furnaces like the one just described are often found among ancient ruins, and their location, generally in courts and gardens, favors the inference that they were used to burn incense in the open air. Those found at Pompeia are sometimes filled with a white and almost impalpable powder, which reminds one forcibly of Pliny's account of his uncle's death, caused by the fine ashes with which the fatal eruption of Vesuvius filled the air at that time. It is an interesting fact, that the hollow parts of this old Roman utensil still contain considerable quantities of these ashes.

1620 Greek Money. Fine specimens in silver and copper, on  
which the Trinne is variously disposed, either occupying  
the whole field, or in part only with other figures.

5 pieces

NOTE.—These coins are chiefly Sicilian. The shape of the Island of Sicily,  
or its three-fold connection with neighboring States, are said to be repre-  
sented by this Triune figure.

1621 Leather Money; a specimen that once circulated in the  
Island and in England.

1622 Butcher's Penny. An exceedingly fine specimen of this Irish  
coin or token, in fine brass; obv. shield and winged bull  
(crest of the Butcher's Co. Arms); "Mic. Wilson, of  
Doublin." Rev. St. George and Dragon; "His half-  
peuny. 1672." This coin circulated freely in the Isle of  
Man until suppressed by the laws of the Island. Very  
rare.

1623 Forgery of the last, in copper; very rare.

1624 Butcher's Penny; Limerick, 1679. Rev. "Limerick  
Batchers," with "Agnus Dei;" also rare, and formerly  
circulated in the Island.

- 1625 Patrick Pence. Copper, with King's Crown plugged in with brass over a King playing on a harp: "Floreat Rex;" rev. St. Patrick holding a Trefoil, arms of Dublin to left. "Eccc Grex." Very fine. 2 pieces.

- 1626\* The same in *Silver*; fine; very rare.
- 1627 Norwich token; very small, with the Triune and the name "John Hutton;" rev. I II E. "In Norwich, 1657."
- NOTE.—This coin is placed here to show that the Triune was used on an *English* token 11 years previously to any coin connected with the Isle of Man; remarkable and very rare, perhaps UNIQUE. . .
